2020 Conference Announcement on Stroke Meet 2020 scheduled during December 07-08, 2020 at Abu Dhabi, UAE

Brankica Vasiljevic

Consultant Neurologist, Department of Neurology, NMC Healthcare, UAE, E-mail: branckiavasij@nmc.ac.in

Conference series is proud to organize Stroke Meet Conferences all over the world. We had been gathering universal experts and eminent people in the field of Neurology for Stroke Meet Conferences all these years. We had a great success in organizing the event “2nd Annual Conference on Stroke and Neurological Disorders” which was held on November 12-13, 2018 at Istanbul, Turkey. Every speaker shared their unique research in the field of Neurology at Stroke Meet 2018. The delegates from countries met the keynote speakers of the conference and shared their experience.

Stroke is a "brain attack" and it can happen to anyone at any time. Stroke happened when blood flow to an area of brain is cut off. When brain cells die during a stroke, abilities controlled by that area of the brain such as memory and muscle control are lost. STROKE MEET 2020 offers the best platform to study, inform and discuss new thoughts, current encounters, medicines, failures and issues related to neurological disorders as well as stroke. It is proceeded by knowledgeable, expert and practiced Neurologists, Neuroscientists, neuro health authorities, neurology nurses and hospitals, stroke consultants, neuro-researchers, neuro health care associates, pharmaceutical companies and a team of many other multidisciplinary authorities and medical device manufacturing company. Stroke Meet 2020 Conference goal is gathering universal experts and eminent people to share and discuss their novel ideas and research work so that it would be beneficial for patients suffering from stroke and neurological disorders. Stroke Meet 2020 objective is to gather the audience from everywhere throughout the world to present current research and to broadcast the new trends in the field of stroke and neurology.

It will be a great platform for the young potential researchers and delegates to breakout sessions, highlighting clinical projects, education, and research studies and also to gain vast knowledge from the Discussion with the Neurologists.

We similarly respect the partnership of scientists, research scholars, surgeons, physicians, science faculty and more spectators, Presidents, CEO’s, Delegates and Industrial administrators from Pharmacy and Health care divisions making the summit an ideal stage to arrange, share outlooks and information through interactive keynote, plenary, posters and B2B debates.

Neuro disorders are the disorders of brain, spine and nerve cells. It occurs due to the faulty genes and by muscular dystrophy. Damage to the nerve cell or death of the nerve cell causes degenerative disorders such as Parkinson’s disease and Alzheimer’s disease. Diseases of the blood vessels that supply the brain include stroke, Injuries to the spinal cord and brain Seizure disorders, such as epilepsy Cancer etc. The persons suffering from Neuro disorders have poor judgment, relapsing of memory, Tremor, Loss of automatic movement, Speech changes, rigid muscle etc. So this conference will provide novel technologies in the development of Neurology and neuro disorders.

The market analysis of stroke and neurology represent the largest and untapped market in medicine sector. This estimated market analysis is based on probability of approval and sales of products in late stage development, demographic trends and marketing of product. Emerging markets once again helps to boost revenues. CNS therapeutics comprises approximately 15% of total pharmaceutical sales, nearly $30 billion worldwide.

Stroke Meet 2018 highlights the main theme of New Emerging Drifts and Tactics on Stroke and Neurological Disorder and saw the gathering of worldwide experts and eminent people who shared and discussed their novel ideas and research work so that it would be beneficial for patients suffering from Stroke and Neurological Disorders and to exchange about state of the art research and technologies. We believe that this conference will stimulate new ideas for treatment that will be beneficial across the spectrum of Brain disorders.

After the completion of Stroke Meet 2018, we will be proceeding with the upcoming “3rd Annual Conference on Stroke and Neurological Disorders” will be held on December 07-08, 2020 in Abu Dhabi, UAE. highlighting the theme of the evident shifts in the therapeutics of Neurological disorders.
